Q1
```
import java.util.Scanner;

class FileTest {
public static void main (String args[])
{

    PrintWriter pw= new PrintWriter ("Third.txt");

BufferReader br= new BufferReader (new File
                Reader ("first.txt"));

BufferReader br1= new BufferReader (new
                FileReader ("second.txt"));

String line = br.readLine();
String line1= br1.readLine();

while (line!=null && line1!=null)
{
```

Scanned with CamScanner

```
if (line != null)
{
    p.println(line);
    line = b.readLine()
}

if (line1 != null)
{
    p.println(line1)
    line1 = b1.readLine();
}
}
```

Scanned with CamScanner

```
pw.flush();
br.close();
pw.close();
System.out.println("Files Merged");
```
